PROJECTS

Smart Car Parking System	Apr 2024
Developed a smart parking system using 8051 microcontroller and Assembly Language. Integrated IR sensors and motor control for automatic gate operation and slot monitoring. Simulated in Keil and Proteus. [Link]	
Flood Level Detection System	Dec 2024
Created an IoT-based flood monitoring system using ESP32, ultrasonic sensors, and Firebase. Sent real-time alerts to a Flutter app based on severity levels. [Link]	
Emergency Chat Box	Mar 2025
Built an offline messaging system using ESP8266 and WebSockets. Enabled real-time communication without internet access, ideal for disaster scenarios. [Link]	
ML-Based Foot Arch Detection	Apr 2025
Developed the frontend using React for a web-based tool that classifies foot arch types. Integrated with Python Flask backend hosting CNN and SVM models to analyze footprint images and generate pressure maps. [Link]	
Personal Portfolio Website	Jul 2025
Designed a portfolio using HTML, CSS, and JavaScript to showcase my skills, projects, and certifications. Demonstrated strong web development fundamentals through interactive layout and custom styling. [Link]
